**GUESTS:** Alex Browning, Callan

**CALL TO ORDER:**

Treasurer Beadle called the State Investment Board (SIB) Investment Committee (IC) meeting to order at 9:05 a.m. on Friday, March 10, 2023, at the Retirement and Investment Office (virtual host), 1600 E Century Ave., Bismarck, ND.

The following Investment Committee members were present representing a quorum, Mr. Anderson, Treasurer Beadle, Mr. Chin, Commissioner Heringer, Dr. Simlai, and Dr. Tian.

**AGENDA:**

The agenda was considered for the March 10, 2023, meeting.

**IT WAS MOVED BY MR. CHIN AND SECONDED BY MR. ANDERSON AND CARRIED BY A VOICE VOTE TO APPROVE THE AGENDA FOR THE MARCH 10, 2023, MEETING AS DISTRIBUTED.**

**AYES: COMMISSIONER HERINGER, MR. ANDERSON, DR. SIMLAI, DR. TIAN, MR. CHIN, AND TREASURER BEADLE  
NAYS: NONE  
MOTION CARRIED**

**MINUTES:**

The minutes were considered for the February 10, 2023, meeting.

**IT WAS MOVED BY DR. SIMLAI AND SECONDED BY COMMISSIONER HERRINGER AND CARRIED BY A VOICE VOTE TO APPROVE THE MINUTES FOR THE FEBRUARY 10, 2023, MEETING AS DISTRIBUTED.**

**AYES: DR. SIMLAI, COMMISSIONER HERINGER, MR. CHIN, DR. TIAN, MR. ANDERSON, AND TREASURER BEADLE  
NAYS: NONE  
MOTION CARRIED**

### **INVESTMENT PERFORMANCE REVIEW:**

Mr. Anderson reviewed the investment performance for the quarter ending December 31, 2022. The markets were very challenging with both equity and fixed income producing negative returns. The performance for PERS, TFFR, Legacy Fund, and WSI were reviewed. Mr. Anderson discussed equity and fixed income risk and return. Committee discussion followed.

### **FIXED INCOME TRANSITION UPDATE:**

Mr. Chin provided an update on the fixed income transition. The object of the transition is to harmonize the investment grade portfolios across pools. This transition has been complex. Staff looked for ways to reduce costs using inter-pool transfers and crossing. State Street Global Markets (SSGM) was hired as the transition manager. The transition began in January 2023 and ramped up on March 6, 2023. Staff expect the transition to be mostly complete on April 1, 2023. Next steps will include a reconciliation and post trade review of the transition with SSGM. Staff will continue portfolio analysis across asset classes and begin work on the Investment Grade Fixed Income Portfolio 2.0 project. Committee discussion followed.

### **INVESTMENT COMMITTEE CONTENT:**

Mr. Anderson reviewed an earlier discussion about the Investment Committee content for the first few meetings. The Committee has spent the first meetings learning about the Investment Program and is now able to move to a more standard agenda. Mr. Anderson reviewed the typical Committee meeting content going forward. Committee discussion followed.

### **LEGISLATIVE BILLS:**

Mr. Anderson reviewed current legislative bills that could have an impact on the investment program. HB 1040 and SB 2239 both address the PERS retirement plan in different ways. Both have passed and have gone to the other chamber.

HB 1088 which changes the composition of the SIB was heard in the Senate Industry and Business Committee which amended the bill back to the original with one exception which would change the Legacy and Budget Stabilization Fund Advisory Board representative to a voting member. The amended version passed the Senate and was sent back to the House.

HB 1227 requires a cost-benefit analysis for a measure or policy affecting the Legacy Fund. This bill passed the House and will soon have a vote in the Senate. Staff have been tracking multiple ESG-related bills. Some did not pass, but HB 1368 and 1429, which have been amended are remaining. SB 2330 would change the Legacy Fund earnings definition and change the Legacy Fund investment policy related to in-state equity. Committee discussion followed.

### **DISCUSSION:**

Mr. Anderson informed the Committee about work that staff has done on country risk. The goal is to gain the ability to trade in other countries and to have separately managed instead of comingled funds. India is a challenge for separately managed funds, but staff are working on a solution. Committee discussion followed.

With no further business to come before the Investment Committee, Treasurer Beadle adjourned the meeting at 11:41 a.m.

1. Sharpe or IR (return per risk) assumes a 2% return on cash over return horizon
2. Assume .01% RIO cost and .02% index cost
3. Based on 2022 fees; lower fees than 2021 -> fewer incentive fees
4. The reference portfolio is not efficient enough to leverage to the policy return (Return equivalent portfolio has a Sharpe of ~.48)
5. PERS 10 yr performance as of 6/30/22

# WE BELIEVE

- Our mission is to deliver a high return per unit of risk; at a prudent level of risk for our client fund mandates; at an efficient cost
- Asset allocation is our chief source of efficient return (return/risk)
- Long term markets are efficient but there are short term inefficiencies that create opportunity for active return
- Active management improves return efficiency but active return is rare so is allocated in appropriate proportions of risk
- Effective implementation is an important driver of lower cost, and lower risk; therefore an important contributor to return efficiency
- Good investment decisions require fact based, reasoned judgements of experienced investment professionals regarding knowledge of compensated risks, investment process and return expectations in an analyst driven culture

# OBJECTIVE AND STRATEGY

## OBJECTIVE:

- To maximize after cost return for risk at a prudent level of risk for the funds in our care

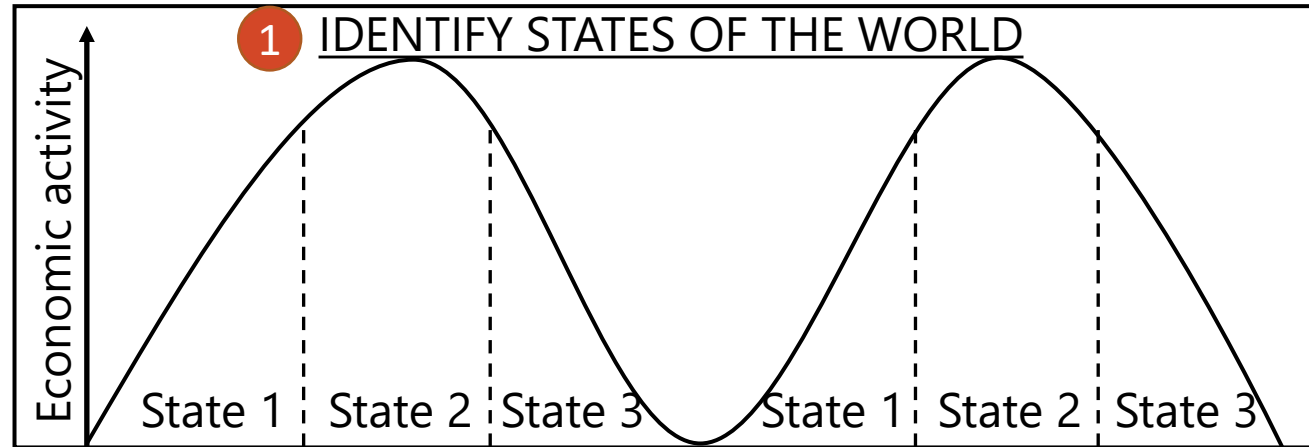

## STRATEGY:

- Develop valuable investment trade-offs of return, risk and cost with time horizon, scale, complexity, and make versus buy decisions as drivers
- Implement trade-offs as state-based investment decisions enabled by technology and integrated across investment teams that leverage direct versus external, and customized versus commodity decisions
- Evolve strategies to be backward compatible

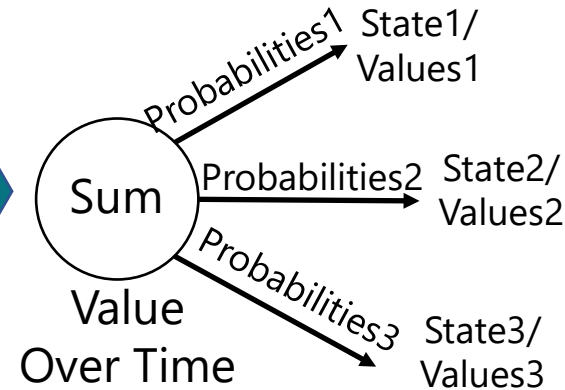

## WHY?

- We will have an advantage from diverse sources of market and business case information from our custom data as well as internal and external manager strategies. RIO will be differentiated with integrated optimization of state-based knowledge management decisions and implementation

- Asset class strategies transacted in public markets over the counter or on exchanges
- Diversified strategies, geography and asset classes such as global equities, investment grade fixed, high yield, multi-asset class, and commodities
- Use of best in class data sources and tools to identify opportunities, construct portfolios and manage risks such as idiosyncratic, market, credit, currency, liquidity, interest rate, and derivative
- Manages investments with manager selection, advanced portfolio construction, exposure management and dynamic allocation and rebalance

- Ensures mitigates uncompensated risks in advance, identifies fund risk hot spots, manages risks as they occur, and ensures an optimal return for risk at a prudent level of risk in all investment strategies
- Provides risk communication to policy makers and investment teams, participates in all investment decisions, develops quantitative analysis for optimal return for risk, participates in allocation of risk capital
- Use and development of best in class data sources, analytics and tools to identify risks, measure return per risk, manage risks with exposure management and contribute to investment decisions

- Asset class strategies directly transacted in the public markets over the counter or on exchanges
- Diversified low risk strategies that enhance portfolio return but at a lower cost and risk for the same return as available with external managers
- Facilitate portfolio operations like proxy voting, overlays, security lending, exposure management, alpha beta separation, cash and liquidity management
- Use and development of best in class data sources, analytics and tools to identify opportunities, construct portfolios, transact and manage portfolio risks

# INTEGRATED INVESTMENT FOCUS

# NEW CAPABILITY - PUBLIC MARKETS DIRECT

## OPPORTUNITY

### ENHANCED INDEXING AND PUBLIC MARKETS STRATEGIES

- Enhanced indexing; multi-asset capability; leverages expertise with index information; same active return for a lower active risk and cost than external managers for simple mandates

### ENHANCED LIQUIDITY MANAGEMENT

- Overlay of cash generates additional return and enables more available cash
- Buying and selling of liquidity

### ENHANCED REBALANCING

- Rebalancing of exposures in shorter time frames
- Rebalancing thru internal portfolios rather than managers – reducing transaction costs

### EXPOSURE MANAGEMENT

- Separate manager active return from manager policy return to optimize cost and active return
- Manage exposures to manage risks and generate returns

### OPTIMAL IMPLEMENTATION

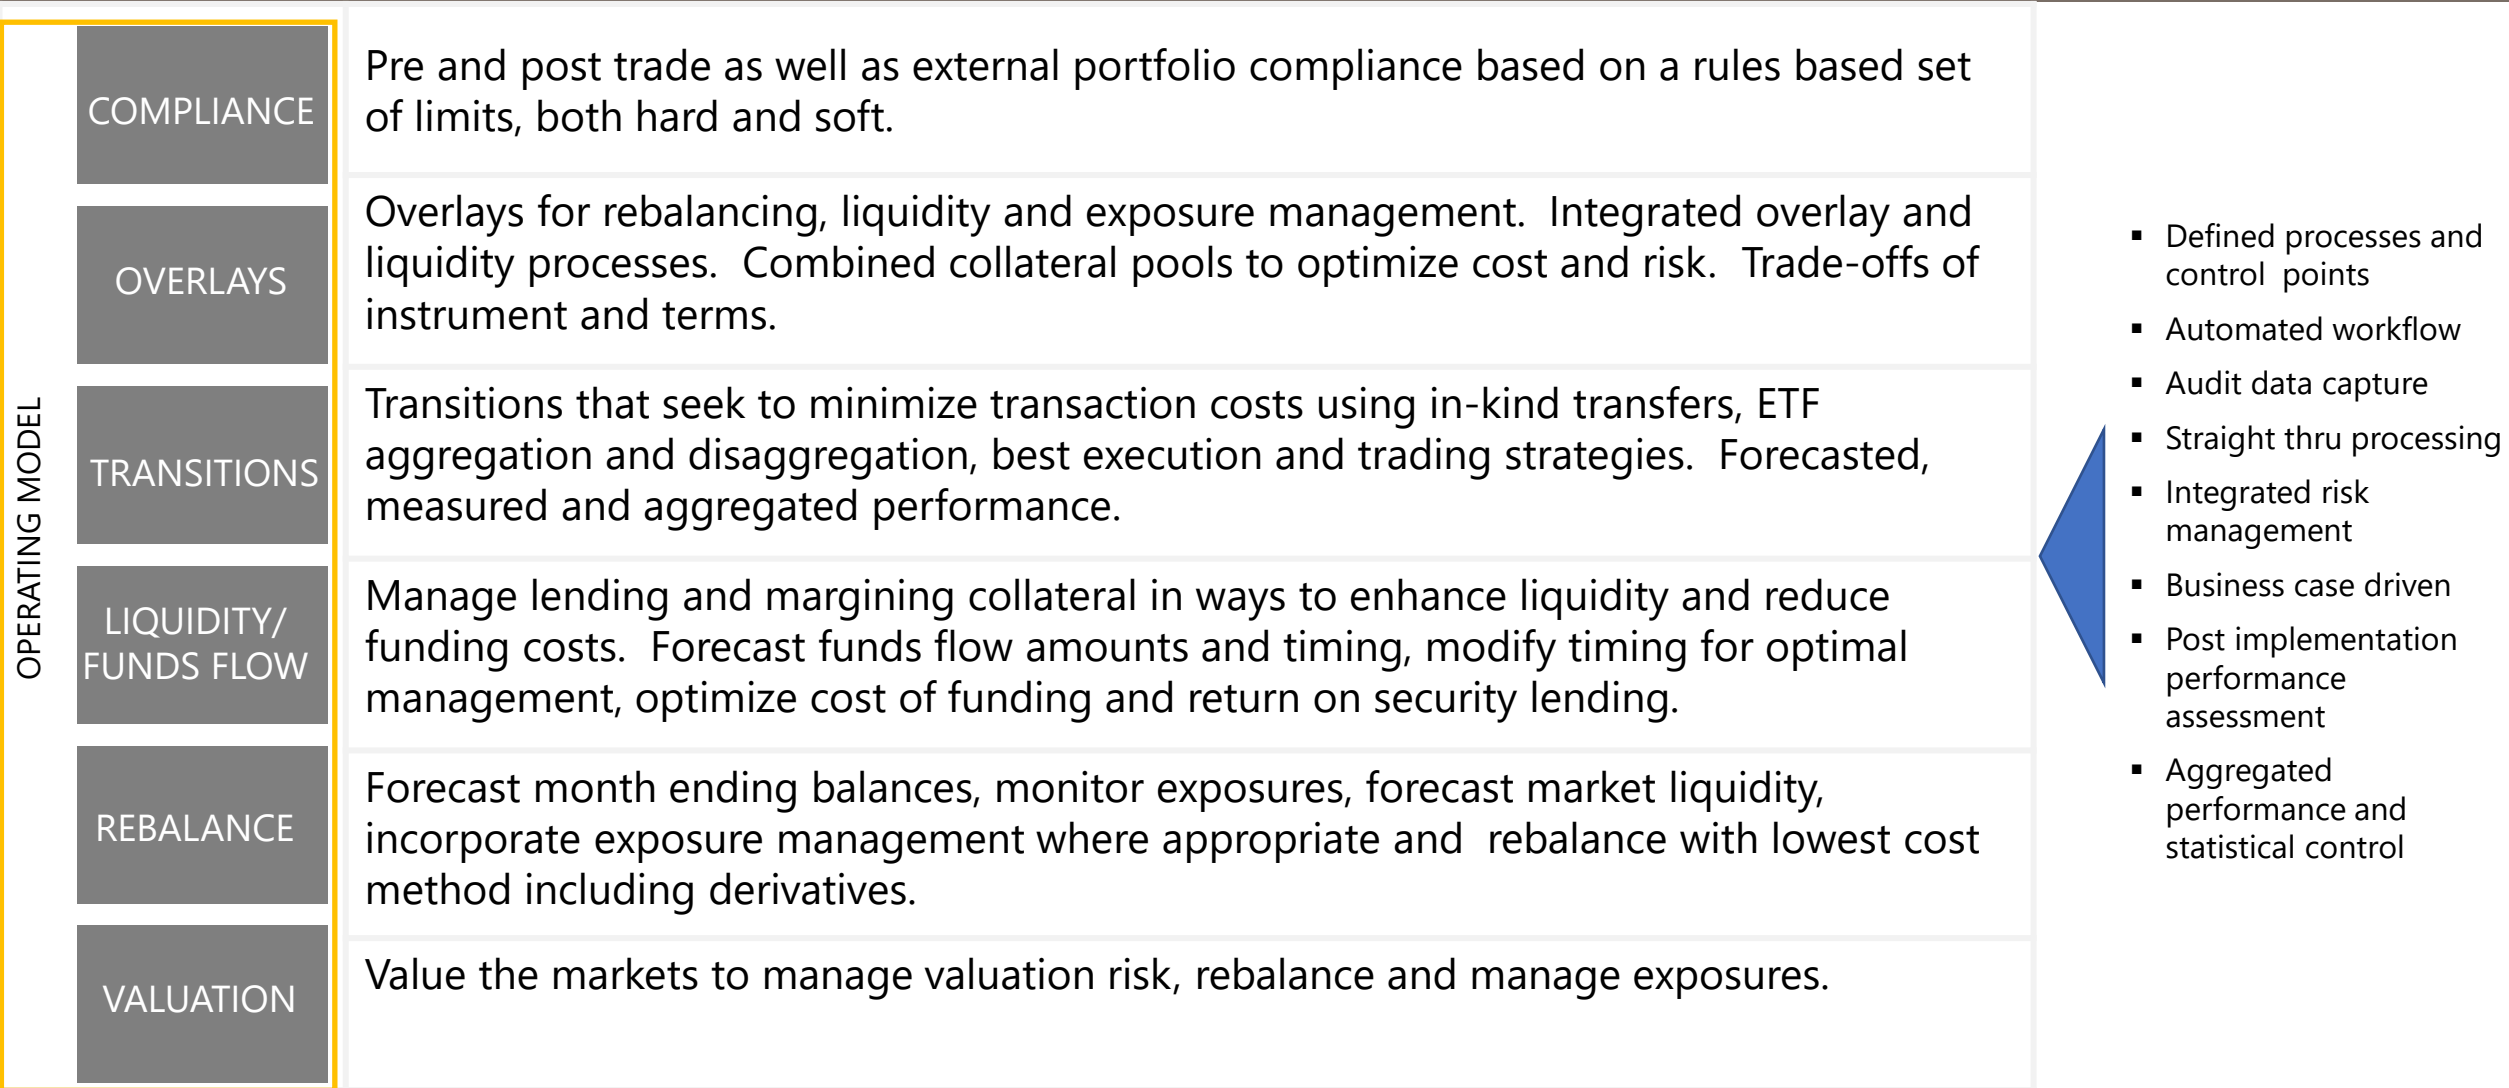

- Choose optimal instrument to implement policy exposures reduces cost, increases revenues, manages risk

- TRACKING ERROR IS IN THE DISCRETION OF THE FUND
- DOES NOT ENCOURAGE SELLING OR BUYING IN THE SECONDARY MARKET
- DOES NOT DISTORT THE ACTIVE RETURN AND RISK MEASUREMENT

# RECOMMENDATION

- CHANGE TO PORTFOLIO WEIGHT EQUAL TO A BENCHMARK WEIGHT WHERE PRIVATE EQUITY REBALANCES THRU PUBLIC EQUITY AND REAL ASSET REBALANCE THRU HALF FIXED INCOME AND HALF EQUITY
- RESTATE THE 2022 FISCAL YEAR BASED ON THIS PERFORMANCE METHOD, ALSO KEEP A PERFORMANCE MEASUREMENT USING THE OLD SYSTEM FOR COMPARISON
- WHEN A BENCHMARK CONSULTANT IS HIRED, ALSO CHOOSE AN APPROPRIATE BENCHMARK FOR THE PRIVATE MARKETS RATHER THAN BENCHMARK IT AGAINST ITS OWN PERFORMANCE
